

Please Note Your New Bill Format

You are currently enrolled in our EPR-2 rate option in which APS purchases the power your system produces. We have updated the format of the EPR-2 service detail page(s) of your bill.

The detail page for your EPR-2 service shows the amount of electricity you purchased from APS and the amount of electricity you sold to APS.

The lower right hand column of the page provides the amount of electricity, in kWh, you sold. The total dollar amount associated with the amount of electricity sold appears in the lower left hand column under "Electricity you sold."

Please call us at 602-216-0318 or 800-659-8148 if you have any questions regarding your bill.

Thank you for participating in our renewable energy program.
