

Renewable energy has never been more affordable. Power your home with clean energy for only 40¢ more a month.

We have reduced our Green Choice rates by more than 50 percent, so now you can help the environment by powering your home with clean, renewable energy for as little as an extra 40 cents a month — that's less than \$5 a year.

With APS Green Choice rates you don't have to install new systems or change your lifestyle to help our Arizona environment. We can provide you with electricity produced from pollution-free resources like wind and geo-thermal and you can choose what portion of your home's energy you want from renewable resources — starting from as little as an extra 40¢ a month.

We offer two easy, affordable options:

Option 1: Green Choice Block

Choose the specific number of 100 kWh blocks of energy you want to come from renewable resources per month. Each kWh is priced at a .004¢ premium plus tax. Your monthly premium remains the same and is added to your normal monthly charges.

Example: If you choose 5 blocks (500 kWh), you'll be billed a monthly premium of \$2 (500kWh x \$0.004 = \$2) plus tax.

Option 2: Green Choice Percentage

Choose the percentage of your energy you want to come from renewable resources — 35%, 50% or 100%. Just like the block option, each kWh is priced at a .004¢ premium plus tax. The premium added to your normal monthly bill changes each month, based on how much energy you use.

Example: If you choose the 35% option and your usage for a given month is 2,000 kWh, you will be billed a premium of \$2.80 (2,000 kWh x 35% = 700 kWh; 700 kWh x \$0.004 = \$2.80) plus tax.

A better tomorrow starts today

Our Green Choice Rates help preserve the environment while securing energy resources for the future. Learn more or sign up now at www.aps.com/greenchoice or call us at 800-659-8148.
