

BIOMASS ENERGY

1. What industries can forest waste material potentially support?

Small diameter wood industries

2. What can the waste material from those industries supply?

Supply fuel to biomass power plants

3. What two recent catastrophes have produced a considerable amount of waste biomass material?

Forest Fires, Bark Beetle Infestation

4. Where is the APS/WRE Biomass Power Plant located?

Eagar, Arizona

5. Disposal of waste material at a power plant such as the APS/WRE Eagar Plant can produce what commodity?

Electricity

6. What is Biomass?

Organic Matter
