

APS Rebates for Commercial Pools

Interested in cutting the operating costs of your commercial pool?

The APS Solutions for Business program can help customers cut their energy costs by improving the energy efficiency of their commercial swimming pool equipment. APS rebates reduce the upfront cost of energy-saving improvements and shorten the payback period.

VARIABLE SPEED DRIVES

Adding a variable speed drive on the pump motor allows the system to vary the flow based on need. This reduces energy use and creates significant cost savings.

Limited Time Offer: We've increased the rebate on variable speed drives to **\$60 per horsepower!** Submit your final application before November 30, 2010 to take advantage of this limited time offer. Applications received after the deadline will be processed at \$50 per horsepower.

MOTORS

An energy-efficient motor saves money every time it runs. Rebates for energy efficient motors range from \$10 to \$30, depending on horsepower.

ELIGIBILITY REQUIREMENTS

- Must be a current, non-residential APS customer
- Equipment must be installed on a commercial swimming pool
- Pool must be located in APS service territory
