**IMPORTANT –
NEW POWER LINES COMING TO YOUR AREA**

BAGDAD 230KV TRANSMISSION LINE

October 2024

Arizona Public Service (APS) is proposing the Bagdad Transmission Line Project, which would include approximately 14 miles of new 230 kilovolt (kV) transmission line (the Project). The new 230kV transmission line would connect a new substation adjacent to the Willow Lake power line to the north and Western Area Power Administration's Mead to Perkins transmission line to the south, providing energy to meet the growing needs of people and businesses throughout the greater Bagdad area.

The transmission line will require a Certificate of Environmental Compatibility (CEC) from the Arizona Corporation Commission (ACC) to comply with environmental permitting requirements.

You are invited to attend the public hearing.

APS BAGDAD 230KV TRANSMISSION LINE

October 2024

APS BAGDAD 230KV TRANSMISSION LINE

Arizona Power Plant and Transmission Line Siting Committee Hearing

In Person

Date and Time: October 28, 2024 at 1 p.m. and October 29 - November 1 at 9 a.m. (as needed)

Location: Rancho de los Caballeros
1551 S Vulture Mine Road
Wickenburg, AZ 85390

Attend online: Link will be posted on aps.com/bagdad once available

aps.com/bagdad

Please visit our project website at aps.com/bagdad.

Por favor visite nuestra página de internet aps.com/bagdad-esp.

WHAT

A new 230kV transmission line, with structures approximately 130 feet high, within an approximately 100-foot right of way, and two new substations

WHY

To support future increased energy usage at the Freeport-McMoRan mine in Bagdad and to provide future opportunities to improve reliability in the area

WHERE

In Yavapai County, from southeast of the U.S. Route 93 (US 93) and Arizona State Route (SR) 97 junction, to approximately one mile west of the SR 97 and SR 96 intersection, near Bagdad, Arizona

PROJECT SCHEDULE

- Launch of virtual open house
- In-person public open house

- Filing of application for a CEC

- CEC Hearing

TYPICAL STRUCTURES*

We work to balance the energy needs of our customers while protecting the environment and natural beauty of the area. The new 230kV transmission line will be built on steel monopole structures, approximately 130 feet high. The transmission line will require a right of way approximately 100 feet wide (50 feet on either side of the line) to safely construct, operate and maintain the line. The length of the line will be approximately 14 miles.

*Exact structure, height, and right-of-way width may vary.

ARIZONA POWER PLANT AND TRANSMISSION LINE SITING COMMITTEE (COMMITTEE) HEARING

The next step for this important project is a hearing before the Committee. State law requires all transmission lines in Arizona with a voltage of 115kV or greater to receive a CEC from the ACC. An important part of this process is the Committee hearing, which has been scheduled to begin on October 28, 2024, at 1 p.m., and continues on October 29th through November 1st, starting at 9 a.m. each day as necessary through the end of the hearing. The hearing will take place at Rancho de los Caballeros, 1551 S Vulture Mine Rd, Wickenburg, AZ 85390. Public comment will be taken in a special evening session on October 28, 2024, beginning at 5:30 p.m., virtually or in person.

- Links to join the public comment session virtually will be posted at aps.com/bagdad once available
- In person: Rancho de los Caballeros, 1551 S Vulture Mine Rd, Wickenburg, AZ 85390

Communities and interested parties are invited to attend the hearing. You may also participate by watching the meeting online or listening to the meeting via telephone. At least 24 hours before the hearing, information regarding online and telephone hearing access will be posted on the project website at aps.com/bagdad.
