

APS 230-kV Power Line Projects Public Information Open House

June 19, 2019, 5-7 p.m.
Desert Star Elementary School
2131 S. 157th Avenue, Goodyear, AZ 85338

We are in the early stages of a public process to determine routes for new 230-kilovolt (kV) power lines in south Goodyear. The additional lines are needed to support electrical service reliability for two new customer-driven projects located northwest of the intersection of W. Broadway Road and S. Litchfield Road. APS is working to identify locations that are acceptable to the public, regulatory agencies, and these new customers.

Your input is very important to us. Members of the public and all interested parties are invited to join APS for an open house on Wednesday, June 19, from 5-7 p.m. You will be able to talk one on one with the project team to learn about the facilities needed; their locations and the siting process in general. You will have the opportunity to provide us with your comments and ideas.

Information about the projects can also be found on our projects webpage at aps.com/siting, click on “find out more” under current projects. Comments can be submitted by emailing GoodyearSouthSiting@apsc.com, or calling 1 (877) 841-9851.
