

We're getting
ready. Here's how
you can too.

Monsoon season is around the corner, and we have been preparing all year long.

While we've strengthened our system, outages can still happen. If you do experience an outage, you can go online or download our app to access the Outage Center at any time.

You can:

- Report an outage in your area.
- View our interactive outage map to find details of current outages.
- Sign up for alerts that notify you when there is an outage in your area, estimated restoration times and when the power is restored.

Visit aps.com/outagecenter to learn more.

Download the app today.
