

YOU COULD BE SAVING MONEY RIGHT NOW

Stagger usage across on-peak hours

What is demand and how can it help you save?

Saver Choice Plus and Saver Choice Max are time-of-use plans with demand. Demand is the single highest hour of on-peak energy used during a billing cycle. That means, the more appliances you use in the same hour, the higher your demand will be. To save money, shift some of your energy use to lower-cost off-peak hours and stagger the use of major appliances across on-peak hours.

Watch a quick video to learn more at aps.com/demand.
