

You're ready  
for summer.  
Is your home?

Find savings tips  
with our online  
Energy Analyzer.

# Energy Analyzer tool — save energy and money this summer.

In about the time it takes to lather up with sunscreen, you'll find potential savings for your home. Answer questions about your home (like size, type and year built). Then get money-saving recommendations tailored to your home. You'll see where you're being energy efficient (good job). And see where you could save on lighting, cooling and more.

Get ready for summer and find the savings in your home with our Energy Analyzer tool at [aps.com/analyzer](https://aps.com/analyzer).
