Tips and rebates
to get your HVAC
ready for summer.

Keep your HVAC in peak condition to help save this summer.

In Arizona, HVAC equipment can account for 30% or more of energy costs for businesses. To help you save energy and money, we're here to help.

Remember:

- Get a tune-up so your system is working at peak efficiency.
- Check thermostat set points — recommended 78° during business hours and 85° degrees after hours.
- Install a smart thermostat to automatically adjust the temperature at key times.

Rebates: HVAC upgrades

Our rebates help make upgrades more affordable. Consider replacing HVAC units that are 15 years old or in poor condition.
