

A woman with dark hair and bangs, wearing a striped shirt and a green apron, is smiling and looking upwards. She is holding several brown paper bags. The background shows a bakery interior with a rack of bread on the left and several pendant lights hanging from the ceiling. The lighting is warm and focused on the woman.

LED fixtures with
integrated controls
reduce complexity
and costs.

LED upgrades.

Save on LED upgrades for your facility.

LED lighting technology is evolving rapidly. The latest generation of LED fixtures offer built-in occupancy and daylight sensors and can reduce lighting energy use by 75%, according to a recent U.S. Department of Energy study. To improve energy performance in your facility, see how LED upgrades can save energy and money while improving your space's light quality.

We can help you save with LED and lighting control rebates at aps.com/s4b.
