Everything EV: Fleet Advisory Service

Get in gear for **Drive Electric Month** from September 12 through October 12 with **APS Fleet Advisory Service**.

Qualifying commercial customers will receive a custom report that covers the economic benefits of transitioning to an electric fleet and the steps to get you there at aps.com/s4b.

Maximize your savings

Discover ways to save energy and reduce operating costs quickly and conveniently with our **Business Energy Analyzer** tool. And one of the best perks? It's free. This easy-to-use tool can help you identify how your business uses energy, and you'll receive custom strategies that can make a difference to your bottom line.

To access the tool, log in to your APS account by visiting aps.com/login. Once you're on your Dashboard, go to the "Usage" section and click on "Go to Business Energy Analyzer for Usage Details" to get started.

The right business plan

Your business is unlike any other. That's why we offer rate plan options that are tiered to fit your unique energy needs. We'll assign you to a tier based on your summer peak energy use, then you can choose between a time-of-use or non-time-of-use plan. Learn more at aps.com/bizplans or call our Business Line at **(602) 371-6767** or **(800) 253-9407** to talk through your options.

Community Corner: STEM grants with Suns

In partnership with Phoenix Suns Charities, STEM Teacher Grants help bring learning to life with awards of up to \$2,500 for K-12 teachers at public and charter schools who lead innovative, hands-on activities that introduce STEM concepts to the classroom. Applications are open through September 30, 2025. Learn more at aps.com/stem.*

National Preparedness Month

We work to help prevent and prepare for wildfires in Arizona by maintaining more than 38,000 miles of power lines and creating defensible space by removing vegetation around equipment poles. You can be prepared, too, by:

Signing in to your aps.com account to be sure your contact information is current in case we need to reach you.

Keeping grass, weeds, trees and shrubs around your business trimmed.

Having flashlights, batteries, a portable cell phone charger and extra water on hand.

Visit aps.com/wildfires for more safety information.

Spotlight on LEDs

LED lighting has gained popularity because of its many advantages, including long life, lower maintenance and brighter output. LEDs can bring the following benefits to your outdoor lighting projects:

- **Enhanced appearance and safety:** LED outdoor lighting makes a facility stand out. Building architecture and landscaping are highlighted to their best advantage. It also improves safety by providing better light distribution and quality, increasing safety in parking and open areas.
- **Energy saving:** More efficient fixtures and energy-saving lighting controls (timers, photosensors and motion sensors) reduce energy bills.
- **Higher reliability:** High-quality LED lighting has less downtime, lowering labor and maintenance costs.

Named among the Most Trustworthy Companies

APS was named to [Newsweek's 2024 list of Most Trustworthy Companies in America](#). We are grateful for the privilege to serve you and the opportunity to earn your trust. As our state continues to experience unprecedented growth, we're ready to invest in Arizona's future with a focus on reliability and keeping bills as low as possible for our customers. We take seriously our responsibility to power your lives and thank you for your trust in us.

WE ARE HERE FOR YOU
