

2023 Year in Review

Sarah Spencer

April 17, 2024

Who are we and what do we do?

Customer to Grid Solutions Product & Program Implementation

We are responsible for reviewing residential and commercial distributed energy resources interconnecting to the APS grid. We comply with the Distributed Generation (DG) interconnection rules and ensure APS interconnection requirements are met for the protection and safety of our customers, our employees and the distribution system.

As part of the Customer to Grid Solutions organization it is our goal to serve as the bridge between what APS customers want and what our grid needs by developing and delivering innovative solutions for a clean energy future.
