

CHOLLA POWER PLANT

## Dam Breach Table Top Drill

**Date:** November 8, 2018

**Attendees:** Terri Parsons, Jeff Cocking, Brent Young, Jim Edwards, Nicole Ratterree, Rick Nicosia, Jim Edwards,

---

**Scenario:** After 3 mos. of heavy storms, a regular inspection found a breach in the dam

Relief checks dam daily and reports back to management, Turbidity report daily, if anything fitting the outline of color change is apparent management will make that call.

Green will start an incident command team right away.

Holbrook is our EOC in case of plant uninhabitable.

Determine minimum staffing once event starts

Increased scrutiny would already be happening

Environmental ramifications would be clean up after the fact notifications will be ongoing

Could burn the diesel fuel up and start using other chemicals as emergency progressed

As soon as we went to green severe plans would start in motion.
