San Juan County Office of Emergency Management
“SJC Dams (Zoom) 2021” Tabletop EAP (EPROD) Blanco Dam After Action Report and Improvement Plan (AAR/IP)

December 8, 2021

Fence line found breached
Truck found parked here
Administrative Handling Instructions

1. The title of this document is the SJC Dams 2021 Functional Exercise, After Action Report and Improvement Plan (AAR/IP).

2. Information gathered in this AAR/IP is designated as For Official Use Only (FOUO) and should be handled as sensitive information that is not to be disclosed. This document should be safeguarded, handled, transmitted, and stored in accordance with appropriate security directives. Reproduction of this document, in whole or in part, without prior approval from San Juan County office of Emergency Management or Enterprise Products is prohibited.

3. For more information about the exercise, please consult the following points of contact (POCs):

   **San Juan County OEM**
   209 South Oliver Drive
   Aztec, NM 87410

   Mike Mestas
   Emergency Manager

Strengths

The strengths identified during this exercise are as follows:

- Thank you to Charles Thompson, Chief Dams Safety Bureau.
- Excellent dialogue with other Dam Owners in San Juan County on EAP.
- Thanks to Enterprise (EPROD) once again for their presentation.
- Agency and Dam Owner collaboration! Good information was shared.
- Relevant questions related to the EAP.
- The exercise was valuable. Allowed us all to understand requirements.
- County Dams Owners have bought into the concept of having TTX/Functional exercises annually! (Thank you)
- Explanation of High Hazard Dams and the need to attend these TTX annually.
- Homeland Security PSA is willing to come to your Dam and do a vulnerability assessment.
- Explanation of reverse 911, IPAWS.
Areas for Improvement

During the Table Top exercise some opportunities for improvement in the Safety plans were identified. Action Items, including some recommendations, are as follows:

- “FEMA P-64 Guidance
  http://www.fema.gov/media-library-data/5b20db599c212f77fd5e85d256f471a3/EAP+Federal+Guidelines_FEMA+P-64.pdf” (Attached to this document Via PDF)
- When you call Dispatch (911) Speak plain Text (No Codes) (No Levels)
- Become more familiar with potential hazards associated with Dams.
- More (Dam) owner participation/representation needed.
- More First Responder attendance needed.
- PIO Attendance.
- Complete a full walk-through of the EAP Process.
- Update your EAP annually.
- Test your call tree.
- Have all Dam owners send their EAP’s to 911 Dispatch? (If you have not already). Call Crystal Arellano @ 334-6622 to be sure.
- Better participation from all agencies next year

Overall, the Table Top was successful. When agencies get together and discuss problems and shortfalls; the outcome is always a positive experience. EPROD (Blanco) Dam is proactive and has implemented plans, procedures, and safety into their plan.
Exercise Planning Team

Mike Mestas, Emergency Manager San Juan County

Charles Thompson, State Engineers Office, DAMS Safety Bureau

Mari E. Garcia, Enterprise Products – San Juan Basin (EPROM)

Ali Rye, Emergency Mgmt. Coordinator; San Juan County

Participating Organizations

State of New Mexico
DAMS Safety Bureau

Response Agencies:
San Juan County Office of Emergency Management
San Juan County 911 SJCCA

Dam Owners:

EPROM: Blanco Dam
City of Farmington: Farmington Lake Dam & Retention Dams
Four Corners Power Plant/APS; Morgan Lake Dam
PNM Power Plant
PaloVerde Generating Station (Jeannie Bell)

Players: 14
Evaluators: 1
Facilitator: 2
Observers: 0
Total: 17
Dams TTX 12/8/21

Exercise Notes

**Dam Requirements:**
- Tabletop exercise
- Submitting EAP/ERP

**Current locations being discussed based on organizations present:**
- **San Juan Generating Station**
  - Changed flow paths to decrease exposed risk (12ft to 8 inches)
- **Enterprise** – Blanco Dam/Reservoir
- **Farmington** – 30th/Farmington Dam/Martin Arroyo/ PV Dam
- **APS – Morgan Lake Dam:**

**Notes**
- (Dispatch) Would utilize Everbridge for mass notifications
- There are regulations in place on driving over dams and fishing from Reservoir.
- Homeland Security evaluations of Dams can occur.
- Knowing that OEM can help organizations with notifications to outside agencies helps a ton
- Scenarios depicted in the TTX would trigger a Level 1 at Enterprise/APS/PNM
- Give POC for incident and POC location during the 911 call to be passes along to IC
- Prepare for Media
  - Location for them to stage
  - Provide appropriate information in a timely manner
  - Coordinate with PIO/PIO group/OEM to help with messaging
- Depending on situation that is described to dispatch will depend on what type of CAD Card will drop. More information given will mean more/more accurate resources to be dispatched
- Call 911 not Non-Emergency
- Most calls go through the plant control room then out to 911
  - Plants 911 calls that go to Shiprock will be rerouted to SJC Dispatch
  - A test with Dispatch would be a good idea
- Enterprise: EAP and ERP are separate documents that contain separate pertinent information (Follow up with Dispatch) Ensure plans are separate in CAD.
- Make sure plans are updated and available to those who need it
  - OEM
  - Dispatch
  - NMOSE
CAPABILITY 1: Capability 1: Onsite Incident Management
Capability Summary: Onsite incident management is the capability to effectively direct and control incident management activities by using the Incident Command System (ICS) consistent with the National Incident Management System (NIMS). As a capability outcome, the incident is managed safely, effectively and efficiently through the integration of facilities, resources (personnel, equipment, supplies, and communications) and procedures using a common organizational structure that is ICS.

A capability for evaluation of the Functional was: Emergency Action Planning (EAP)

Activity 1: EAP
Activity Description: Review Emergency Action Planning Documents for Dams.

Summary of Strengths
Activity: Discuss Full On-Site Incident Command & Emergency Action Plans
Activity Description: Discussion on staff and facilities necessary to conduct EAP Planning.

Emergency Planning Observation:
Analysis: Emergency Procedures were known by the majority of personnel in the room. Most players knew their positions and responsibilities during an emergency.

Analysis: Excellent exchange of information. Most members contributed to the scenario discussion.

Areas for Improvement
Activity 2: Participation/Review from Dam Owners.
Activity Description: P-64 Guidance
Analysis: P-64 Guidance for participation and requirements

CONCLUSION
Agencies and EPROD (Blanco) Dam exhibited the level of cooperation that is needed for a sustainable response. Table Top Exercises continue to be valuable as a method for improving incident response management. Combined with regular EAP updates & exercises that focus on the response and evacuation will pay dividends during a real-world emergency.

**IMPROVEMENT PLAN**

This IP has been developed as a result of the SJC Dams 2021 TTX conducted on 12/08/2021. These recommendations draw on comments and review from the exercise. The IP should include the key recommendations and corrective actions identified. The IP has been formatted to align with the Corrective Action.
