

**RATE SCHEDULE GS-SCHOOLS L
GENERAL SERVICE TIME OF USE (401 kW +)
ELEMENTARY AND SECONDARY SCHOOLS**

AVAILABILITY

This rate schedule is available to private and public elementary and secondary schools (K-12) whose average monthly maximum demand is greater than 400 kW and less than 3,000 kW per month.

DESCRIPTION

This rate schedule is a three-part rate: a basic service charge; a demand charge for the average demand (kW) supplied during the 15-minute period of maximum use during the month; and an energy charge for the total energy (kWh) used for the entire month. The rate was designed to recognize the unique daily and seasonal patterns of electricity use by many schools throughout the State; therefore the energy charge will vary both by season (Summer-Peak, Summer-Shoulder or Winter) and the time of day that the energy is used (On-Peak, Shoulder-Peak, or Off-Peak).

The Company will place the Customer on the applicable Rate Schedule GS-SCHOOLS M or GS-SCHOOLS L based on the average summer monthly maximum demand, as determined by the Company each year. This determination will be made annually.

3. Customers receiving service at voltage levels of 69 kV or above must maintain a power factor of $\pm 95\%$.
4. The Company may install certain monitoring equipment to test the Customer's power factor. If the load doesn't meet the requirements the Customer will pay the cost to install and remove the equipment.
