ADJUSTMENTS

The bill will include the following adjustments:

1. The Renewable Energy Adjustment Charge, Adjustment Schedule REAC-1.

2. The Power Supply Adjustment charges, Adjustment Schedule PSA-1.

**POWER FACTOR REQUIREMENTS**

1. The Customer's load must not deviate from phase balance by more than 10%.
2. Customers receiving service at voltage levels below 69 kV must maintain a power factor of 90% lagging. The power factor cannot be leading unless the Company agrees.
3. Customers receiving service at voltage levels of 69 kV or above must maintain a power factor of  $\pm 95\%$ .

#### SERVICE DETAILS

1. Service under this schedule is generally provided at secondary voltage. When the Customer owns the distribution transformer(s) service is provided at primary voltage.
2. The type of service provided under this schedule will be three-phase, 60 Hertz, at the Company's standard voltages that are available within the vicinity of the Customer site.
3. Daily metering charges apply to typical installations. Customers requiring specialized Equipment may incur additional metering charges that reflect the additional cost.
4. Customers that self-provide some of their electrical requirements from on-site generation will be billed according to one of the partial requirement rate riders.
5. Some Customers will have a service agreement or contract that specifies certain provisions of their electric service, such as a contract length, minimum and maximum monthly loads, special charges, and other service details.
6. Eligible military base refers to a military base receiving service at a primary voltage and served from a dedicated distribution feeder.
7. Electrical service must be supplied at one point of delivery and measured through one meter unless otherwise specified in a service agreement.
8. This schedule is not applicable to breakdown, standby, supplemental, residential or resale service.
9. Direct Access Customers who purchase available electric services from a supplier other than APS may take service under this schedule. The bill for these Customers will only include the Unbundled Component charges for Customer Accounts, Delivery, System Benefits, and any applicable Adjustments. If metering and billing services are not available from another supplier, those services will be provided by APS and billed to the Customer at the charges shown above.
10. APS provides electric service under the Company's Service Schedules. These schedules provide details about how the Company serves its Customers, and they have provisions and charges that may affect the Customer's bill (for example, service connection charges).
