**PUMP UP THE SAVINGS**
Is your pool pump flooding you with unnecessary energy expenses? Replacing your old single-speed pump with an energy-efficient variable-speed pool pump is an upgrade that quickly pays for itself with a $100 rebate and annual savings of up to $150.

And now, you can see how much you can save with our Pool Pump Savings Calculator, which lets you:

- Calculate your savings for an entire year
- Search a list of participating pool pump retailers

Please visit aps.com/poolsavings to dive into the savings.

**KEEP YOUR COOL WITH AN AC REBATE**
When monsoon season hits, humidity rises and can cause air conditioners to fail. To help prevent the unexpected loss of your home’s cooling, we offer an AC rebate for replacing your old AC or heat pump with a new, energy-efficient system.

You can earn $245 in rebates when you have a participating contractor replace your old system with a new one. And a properly installed system can reduce your cooling costs by as much as $180 per year.

To learn more about our AC rebate program, please visit aps.com/ac or call (602) 371-3636 (metro) or (888) 890-9730 (other areas).

**DELIVERING SOLAR POWER RIGHT TO YOUR DOOR**
With more than 300 days of sunshine every year, Arizona is a virtual gold mine of solar power. Providing our customers with the greatest solar benefits at the lowest possible cost is our goal as we work to get the most out of this abundant natural resource.

We’re focused on bringing solar power to all of our customers. Recent studies have shown that universal solar is more cost-effective and provides more environmental benefits than private solar. And for the past five years, we’ve been hard at work building nine grid-scale solar plants around the state as part of our AZ Sun Program. These large solar farms are equipped with thousands of solar panels that track the sun across the sky and convert its rays into electric energy that we deliver to our customers.

We understand how important solar power is to Arizona’s future and we’ll continue to invest in solar technology to power homes and businesses across our state.
COMMUNITY CORNER

Teachers looking for extra funds for classroom projects have the opportunity to apply for grants through a partnership we’ve formed with the Phoenix Suns. Through the APS/Phoenix Suns Mini-Grant Program, $50,000 is made available to classroom teachers for hands-on projects with an emphasis on Science, Technology, Engineering and Math (STEM). The grant program is available to teachers located within our service territory, and each teacher can apply for up to $2,500.

The mini-grants are just a small portion of what we are doing to help educators statewide. Through our APS Foundation, we provide significant funding for STEM to help teachers better prepare students for their future careers. In 2015, we donated more than $3.2 million to boost education in our state. In addition, we support the Arizona Educational Foundation and the Arizona K-12 Center to provide resources and support for Arizona’s educators.

The future of Arizona is in each and every one of our classrooms. Contributing to our students’ education today is the best way to create a stronger future for all of Arizona.

Please visit aps.com/corporategiving to learn more and download the STEM mini-grant application (available 8/8/16–10/5/16).

As the saying goes, knowledge is power. You can gain the knowledge to reduce your energy use plus the power to keep your family comfortable this summer and year-round just by taking advantage of our free online Energy Analyzer.

Energy Analyzer is a powerful tool that can compare your actual energy use with the design of your home and tell you how efficient your home really is. It will also show you how your home’s energy usage compares to similar homes in your neighborhood, and suggest programs that may help reduce your costs even more—including programs that can earn you more than $1,000 in rebates.

Please visit aps.com/ea and in less than five minutes, you’ll get the knowledge you need to control your power.

Sincerely,

Stacy Derstine
