SOLAR STRONG

Arizona's abundant sunshine represents an awesome source of energy. And harnessing it allows our customers to benefit from solar power. In fact, 12% of the energy we provide is from solar and other renewables.

Through our innovative Solar Partner Program, we bring rooftop solar to our customers while we study its impact on the grid. And through our AZ Sun program, we own and operate nine grid-scale solar plants across Arizona. We’ve also helped more than 300 schools, government agencies and nonprofits statewide go solar.

POWERING ARIZONA’S ENERGY FUTURE

Arizona is growing and as it grows, so do our energy needs.

Due to the anticipated growth of our state’s population and economy, the demand for energy generated will increase 60% by the year 2032.

Because our customers want increasingly clean, reliable and affordable electricity—and a smarter, stronger energy grid, we’re working on ways to ensure these needs are met. To help manage the expansion of solar and other renewable energy sources, we’re adopting emerging technologies such as energy storage and other smart grid devices. In order to maintain a high level of reliable energy, we continually invest in modernizing our power plants and upgrading the power grid.

As Arizona continues to grow, we’ll keep working to ensure a bright energy future for our customers and our state.
AT YOUR SERVICE

We’re all aware that summer in Arizona can be brutal on our home’s cooling systems. The heat takes its toll on older, overworked air conditioners, often causing them to stop working when we need them most.

Did you know we offer some great rebates to help you beat the heat by upgrading your cooling system? You can earn $245 in rebates when a participating contractor replaces your old AC or heat pump with a new, energy-efficient system. And, a properly installed system can reduce your cooling costs by as much as $180 per year.

By taking advantage of our various rebate programs, we can help you keep cool this summer.

Please, take a moment to learn more about our AC rebate program, by visiting aps.com/ac or calling (602) 371-3636 (Phoenix metro area) or (888) 890-9730 (other areas).

Sincerely,

Stacy Derstine  
VP Customer Service and Chief Customer Officer

COMMUNITY CORNER

As summer temperatures climb, it’s the perfect time to keep cool with some of our partner organizations across the state:

- **The Heard Museum**—Enjoy the “Frida Kahlo and Diego Rivera” exhibit that includes 33 works by two of the most important and recognizable artists of the 20th century.

- **Arizona Science Center**—Explore the year-round hands-on exhibits and displays, plus a new exhibition of artwork called “Reimagined Trash” in partnership with the City of Phoenix.

- **Phoenix Art Museum**—Check out “Good Sport” which pays homage to the celebrated rites and rituals of athletic pursuits and their depiction in works of art throughout the ages.

Looking for options outside of the Valley?

- **For Northern Arizona**, consider visiting the Flagstaff Arboretum, the Museum of Northern Arizona or Sharlot Hall Museum in Prescott.

- **In Southern Arizona**, keep cool at the Bisbee Mining and Historical Museum, Yuma Children’s Museum or the Yuma Art Center.

The summer is a great time to experience the beautiful state we live in.

WHO KNEW?

SAFETY FIRST

Keep your family safe around pools this summer:

- Electricity and water don’t mix—if you have wet hands, dry them before touching appliances

- Any electric devices plugged into an outlet, including radios, speakers and phone chargers, should be kept away from pools

- Never leave children or pets unsupervised in or near a pool

And please remember, have a safe day. Visit aps.com/safety.
