GET THE MOST OUT OF YOUR TIME-OF-USE PLAN
Our time-of-use service plans offer some great opportunities for saving money. Are you taking full advantage of all the savings available?

SHIFT your energy use to off-peak hours
STAGGER your use of major appliances across on-peak hours
SAVE by reducing your overall energy use

Don’t forget, off-peak (lower cost) hours are after 8 p.m. and before 3 p.m. weekdays, plus all day on weekends and 10 major holidays.

We're proud to support the Arizona Firefighters Fund in its mission to save the lives of first responders and those they serve. For the fourth consecutive year, we funded scholarships for 100 firefighters to attend the Arizona State Fire School for volunteer and rural fire departments.

Helping Solar Energy Shine Bright in Arizona
Clean and sustainable solar energy is on the rise in Arizona. The APS Solar Communities program gives limited- and moderate-income customers access to rooftop solar. The program will also include apartment complexes and non-profits, schools and rural government agencies that serve limited-income members of the community.

We recently added $1 million in crisis bill assistance to provide more customers with temporary support in paying their electric bill. This additional funding is available from St. Vincent de Paul and a new program partner, Chicanos Por La Causa. Plus, customers can still access this support from the Arizona Community Action Association network.

September is National Preparedness Month. Taking a few simple steps can help prepare you and your family for emergencies, large and small:
- Learn lifesaving skills such as CPR and first aid
- Consider the cost of potential disasters and save for an emergency
- Know how to take practical safety steps such as shutting off water and gas

If you see a “Danger High Voltage” sign, heed its warning and stay away from any power lines, electric substations or pad-mounted electrical equipment
Never enter a substation—these facilities aren’t open to the public
If you notice any suspicious activity inside or near a substation, call 911 immediately
